## **Welcome to our special effects studios in Hamburg-Altona**

We travel around the world in our capacity as experts for special effects. At home in Hamburg, we enjoy welcoming video and photo productions to our studios where we work in an informal and friendly atmosphere on the productive and creative realization of your projects.

Our studio is quick and easy to reach: It's only one train stop from Hamburg-Altona, 10 minutes from central station, 3 minutes on foot from Diebsteich train station, 10 minutes by bike from Hamburg-Altona or 10 minutes by car from the A7 motorway (exit "Volkspark"). Ample parking space is available on the street or directly in the courtyard.

DIY stores, food wholesalers and various restaurants around the corner offer everything you might suddenly need. You can also apply for the Green Shooting Card for your production – this is issued by the Film Commission. (see [https://www.ffhsh.de/de/film\\_commission/gruener\\_drehpass.php](https://www.ffhsh.de/de/film_commission/gruener_drehpass.php) for more details) We support you in this respect by providing short distances, green electricity and sustainable management, e.g. for catering and in the office.

**Let us make you an offer you can't refuse: Rents start from EUR 450 per day.**

**In our woodwork and metal processing workshops** we can adapt your rigs individually at short notice and build parts for sets or fantastic mockups. In the adjacent paint, mockup and prop workshops we can make all kinds of mockups in any scale you want. Or you might even find the right prop for your production in the extensive pool we have on offer.

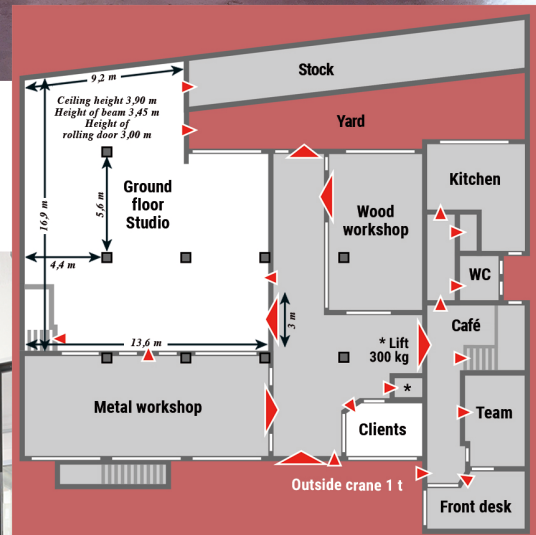

You can also rent cameras with an operator, lighting, motion control systems and a selection of fine lenses. See the pdf document "**Cameras, grip etc.**" for details on the selection available.

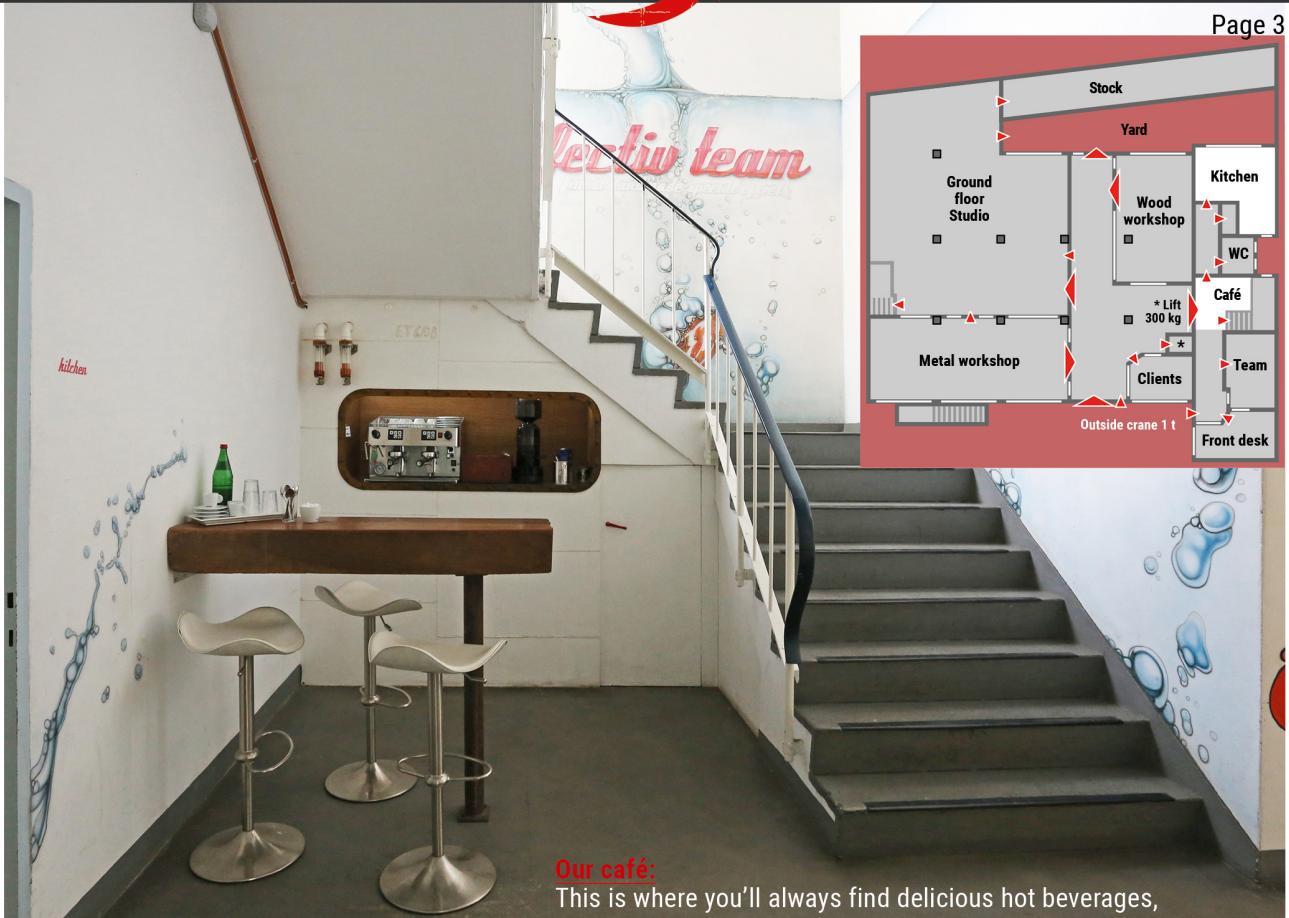

We also offer lots of treasures from our warehouses, such as the precisely adjustable rain rig, the extra-strong automatic turntable, the glass oven, the motion control system and various rigs. See the "**Specialities**" pdf document for details.

**If you'd like to see for yourself, you'll find photos of our rooms on the following pages.**
