We offer cameras, optics, moco and grip equipment for rent:

With up to 2500 frames per second, our cameras capture moments that are barely visible to the eye. For exceptional viewing angles we can also offer you a selection of fine lenses for your production as well as basic lighting and grip material suitable for high-speed. You can book additional equipment for larger-scale shootings.

High speed cameras:

Phantom Flex 4K 4K 64 GB 938 fps in 4K (4096 x 2304), 1977 fps in HD (1080 x 1920).

The Phantom Flex 4K produces high-resolution 4K images at 1000 fps. The Flex 4K was developed for professional cinema applications: 938 fps, 4096 x 2304, Super 35 mm Colour Sensor, ISO 250, Rec. EI 800 - 1000, 64 GB RAM

Phantom Flex 2K 32 GB, 2500 fps in HD (1080 x 1920).

Lens mount: PL Sensor type: CMOS sensor format: S35 (25.6 x 14.4 mm) Sensor resolution: 2560 x 1600 pixels, Colour depth: 12 bit min. ISO: 1000 max. ISO: 1600 base ISO: 1250 II recording format: Phantom Cine RAW Codec: uncompressed data rate max: 8.5 GB/s.

Phantom HD Gold 8 GB, 1000 fps in HD (1080 x 1920)

1000 frames-per-second (fps) at 1920 x 1080 or 1500 fps at 1280 x 720, 550 fps at 2048 x 2048. Adjustable frame rate in 1 fps increments, shutter speeds as fast as six microseconds (shutter angle from 1-360 degrees), 14-bit sensor depth (42-bit color), active-pixel CMOS sensor 35 mm depth-of-field 11 stop tonal range, Phantom CineMag® compatible

Optics:

Zeiss Standard T2.1 Prime Lense Set: 16, 24, 32, 40, 50 mm

Leica Van Diemen 90 mm Macro

Revolution Lens System Snorkel

Swivel and Periscope Module

MiniPL Lenses: 9,8 / 12 / 16 / 20 / 24 / 32 / 40 / 60 mm

Laowa Probe, Macro 24 mm / f14

Moco, matching grip material and lighting are on the next page.

Moco:

Precisely repeatable, controlled rides and movements for the camera and your product: Adjustable starting and end points, speed and ramp positions. You can rent our super-precise **Motion control model movers** with an operator, including technical support.

Grip:

Magnum Dolly: modular dolly system with electromechanical lifting column enables precise and stable column drives, programmable start and end points, selectable speed levels and ramp settings, 360° column-rotation, maximum load: 800 kg, transport weight: 140 kg.

U-Bangi:

The Panther U-Bangi Slider was specifically designed to enable shooting within a large radius. The Magnum Dolly makes it possible to achieve different positions within this fictitious globe. The advantages when shooting are: Camera tracking with little effort, quick and easy setup by one person and stable and smooth movement with up to 80 kg camera weight.

Three-part snake arm: The snake arm makes it possible to reduce the ground clearance of the camera on the dolly, thereby extending the range of the camera, without any loss of stability.

Bazookas: This grip component extends the pillar and thus the height of the camera on the dolly by 30 cm and 40 cm.

Lighting:

We can offer you basic lighting suitable for high-speed. You can also book additional equipment for larger-scale shootings:

4K HMI Arri Compact, 2 x, Compact 4K HMI Fresnel, 2.5 / 4K DMX electronic ballast, flicker-free, filter frame, hinged doors.

Tungsten, pole-operated Fresnel 5 kw 3 pc., 5 kw 1 pc. with dimmerboard.

If you have any further questions or would like information on prices and availability,

just give us a call or send us an e-mail.
